Dear Sir/Madam,

I would like to apply for the role "Frontend Developer" at Our Company ..

I have 2 years of experience working as a Senior Process Executive, at Cognizant Technology Solutions. I was responsible for maintaining the data, achieve productions and maintain quality, prioritizing the tasks, checking the queues, support colleagues, conducting minuting meetings as well as being responsible to achieve the target.

During the COVID-19 pandemic, like many professionals, I encountered a career gap unfortunately due to some personal commitments. However, I utilized this time to focus on personal and professional development, further honing my skills and knowledge with "MERN full stack development". I completed several online courses, including Game design & development, to stay abreast of industry trends and emerging technologies.

I am now eager to re-enter the workforce and bring the insights and skills gained during my career break to organization. I am confident that my background in Frontend technology's HTML, CSS, JS , React, Tailwind and MERN which is a back-end development and my proactive approach to professional development make me a valuable asset to your team. I am particularly drawn to the role "MERN full stack development" and am excited about the opportunity to contribute my knowledge.

Thank you for considering my application. I am looking forward to the possibility of discussing how my experiences and skills align with the needs of your company. Please find my resume attached for your review. I am available at your earliest convenience for an interview, and I can be reached at email adithya649@gmail.com

Sincerely,
Adithya J
